

# Deep Dive Workshop

Our 'Innovative & Impactful Organisation Deep Dive Workshop' helps you to better understand one of our 4 principles, that is the biggest area for improvement for your organisation. We start by aligning your leaders on what your current and unique challenges are, and then facilitate a collaborative discussion to create a plan, that will get you on your way to creating a more innovative & impactful organisation.

## Topic 1: Where Are We Now?

Prior to the workshop, we agree on which of our 4 principles we will unpack during the session. We begin the workshop by facilitating a discussion with your leaders, to better understand your unique situation and challenges. We then align your team on what the true areas for opportunity are.

## Topic 2: What Do We Want To Achieve?

Once we have agreed on the current challenges, we now work with your leaders to draw out what they really want to achieve. This provides us with 'guide-rails' for when we go on to creating ideas, to ensure that our ideas are going to solve the challenges and deliver what all of your leaders need.

## Topic 3: Create Options To Move Forward

We then run a brainstorming session with your leaders to create a tailored path to move forward. We add additional value by offering some of our own ideas and provide examples from similar organisations we have worked with, that may work in your organisation too.

## Topic 4: Agree On The Approach & Formalise Plan

Finally, we help you to prioritise the ideas and choose the best ones to take forward. We finish the session by working with you to fill out your plan, so that you have everything you need to move forward and to make your organisation even more innovative & impactful.
